

Nadeem Ali

Senior Platform Engineer | Site Reliability Engineer | BFSI & Cloud-Native Infrastructure

Uttar Pradesh, India · nadeemali001@gmail.com · linkedin.com/in/nadeemali001 · nadeemali001.github.io · Open to Remote — EU · UK · US · APAC

PROFESSIONAL SUMMARY

Senior Platform Engineer and SRE with 11+ years building and operating mission-critical infrastructure across BFSI, trading systems, and cloud-native environments at **Fidelity International** and **Amazon**. Specialises in designing reliable, scalable, and self-service infrastructure platforms — Kubernetes-based compute, Infrastructure-as-Code with Terraform, CI/CD pipeline design, observability tooling (Prometheus, Grafana, ITRS Geneos), and automated remediation at scale. Deep domain expertise in FX and equity trading systems (Charles River IMS) with a rare combination of platform engineering depth and BFSI compliance awareness. Actively targeting **Senior Platform Engineer** and **Staff SRE** roles — remote-first.

CORE SKILLS

Platform Engineering	Kubernetes · Docker · Helm · Internal Developer Platforms (IDP) · GitOps · ArgoCD
Infrastructure as Code	Terraform · AWS CloudFormation · Infrastructure Automation · Self-service tooling
Cloud & DevOps	AWS (EC2, EKS, S3, Lambda, IAM) · CI/CD Pipelines · Python · Shell Scripting · Linux
Observability & SRE	Prometheus · Grafana · ITRS Geneos · SLIs · SLOs · Error Budgets · Incident Management
Data & Workflow	Apache Airflow · Snowflake · Data Reliability Engineering · Fault-tolerant pipelines
BFSI Domain	Charles River IMS · FX / Equity Trading Systems · Regulatory Compliance · Low-latency Ops

PROFESSIONAL EXPERIENCE

Technical Specialist — Platform Engineering & SRE

Fidelity International · Jan 2023 – Present · 3 yrs 6 mos · India (Hybrid/Remote)

- Engineered SRE observability pipelines for mission-critical FX and equity trading systems on Charles River IMS, reducing false positive alerts by **30%** through intelligent threshold tuning and automated suppression logic in ITRS Geneos — improving MTTR and on-call engineer experience.
- Automated **40%** of manual operational processes by designing and deploying self-service Cloud and DevOps tooling using Terraform, Python, and AWS — reducing toil for 3 development squads and accelerating deployment frequency across production environments.
- Designed and implemented Infrastructure-as-Code (IaC) patterns for trading system deployments, enabling repeatable, auditable, and version-controlled infrastructure changes across regulated BFSI environments.
- Led data reliability engineering initiatives using Apache Airflow and Snowflake — building fault-tolerant, SRE-aware data pipelines applying error budget principles and circuit-breaker patterns.
- Drove platform observability improvements integrating Prometheus and Grafana dashboards, replacing manual monitoring with automated SLO-aligned alerting across production trading infrastructure.

Support Engineer III — Platform & DevOps (SRE)

Amazon · Mar 2022 – Jan 2023 · 11 mos · India

- Reduced seller onboarding escalations by **25%** by engineering automated CI/CD pipeline validation checks and system patch verification workflows across 12 production services.
- Owned system reliability for Amazon Marketplace seller-facing infrastructure — triaging, diagnosing, and resolving production incidents with focus on MTTR reduction and permanent root-cause elimination.
- Collaborated cross-functionally to embed SRE principles (error budgets, SLO definitions) into a DevOps-first operational model, reducing post-deployment issues by **20%** over 6 months.

Senior Analyst Programmer — SRE & Trading Platform

Fidelity International · Oct 2020 – Mar 2022 · 1 yr 6 mos · Noida, India

- Owned reliability for trading system workflows in Charles River IMS — enforcing data integrity and automated validation pipelines across FX and equity trade processing, achieving **zero SLA breaches** over 12 consecutive months.
- Designed ITRS Geneos monitoring rules and alert suppression logic, reducing alert noise by **35%** and improving on-call signal-to-noise ratio across the BFSI platform team.
- Built automated test and validation frameworks for trade program outputs, reducing manual QA effort by **50%** and enabling faster iteration cycles for the trading platform.

Analyst Programmer — Production Support & SRE

Fidelity International · Feb 2018 – Sep 2020 · 2 yrs 8 mos · Noida, India

- Maintained production reliability for time-critical trading workflows — keeping SLA breach rate below **0.5%** across peak trading windows through proactive monitoring and rapid incident response.
- Implemented automated health checks and monitoring scripts for production trading jobs, reducing human-in-the-loop dependency on routine checks by **60%**.
- Collaborated with senior trading desk stakeholders during incidents, bridging technical and business communication in high-pressure regulated environments.

CERTIFICATIONS (17 TOTAL — KEY HIGHLIGHTS)

AWS Certified AI Practitioner — Amazon Web Services · Feb 2025

AWS Cloud Practitioner Essentials — Amazon Web Services · 2024

Google Cloud Fundamentals: Core Infrastructure — Google · Oct 2025

Hands-On Essentials: Collaboration, Marketplace & Cost Estimation — Snowflake · Apr 2025

Learning Amazon Web Services (AWS) for Developers — LinkedIn Learning · 2023

ITRS Geneos Monitoring — Fidelity Internal Certification

EDUCATION

B.Tech — Computer Science & Engineering · Dr. A.P.J. Abdul Kalam Technical University · Graduated 2014

Activities: Event Management Group · Distributed Systems coursework
